

Socrates Academy Multi-Tiered System of Support

Socrates Academy is implementing an MTSS (Multi-Tiered System of Support) framework that promotes school improvement through academic and behavioral practices to ensure growth and success for all scholars.

At Socrates Academy, we believe that all scholars are able to grow and learn in classrooms that foster understanding and provide effective instruction tailored to meet the needs of each learner. Our mission is to improve our school through a systematic, data-driven, problem-solving approach.

The use of a multi-tiered framework for academics and behavior helps to foster student engagement, positive social interactions, and academic achievement for all students. Effective implementation of MTSS requires school staff to review and analyze available sources of data to support increased student performance and school success. A review of the following data related to your student's academic and behavioral progress may occur, and your child may receive the following screenings as part of the MTSS:

- review of records
- attendance
- parent/guardian conferences
- classroom observations
- vision screenings
- health screenings
- speech/language screenings
- mCLASS/DIBELS scores
- reports cards/transcripts
- student conferences
- office discipline referrals
- behavioral screenings
- hearing screenings
- motor screenings
- End-of-Grade test scores
- MAP scores

Your knowledge of your child's strengths and needs is so important to us; therefore, your continued collaboration and support is essential to his/her success.

Please contact your child's teacher if you have any questions or concerns.
